**How Do Other Animals Show That They Are Angry or Happy?**

When the cat is angry or afraid, it arches its back to make itself look bigger. But when it is happy it purrs.

When a horse is angry, it pulls back its ear and curls its lips to show its teeth. But when it is happy, it lifts its tail high in the air.

When a rabbit is happy, it twists its body as it hops along.

**Which Birds Are Good at Talking?**

Some birds are especially good at learning to talk. Some are not capable to repeat words but can also copy other sounds.

The thick, rounded tongues help get nuts and seeds out of their shells but in captivity, they may also help parrots to shape words and sounds.

Myna bird can utter a sound just like a telephone ringing. This bird is quick at learning to repeat words and sounds.

The African parrot and some Amazon parrots are particularly good at imitating human speech. Other known birds that can talk are the Budgerigars and Love birds.
