

Lesson 17

SUPER SAVERS Setting Up A Screen Saver

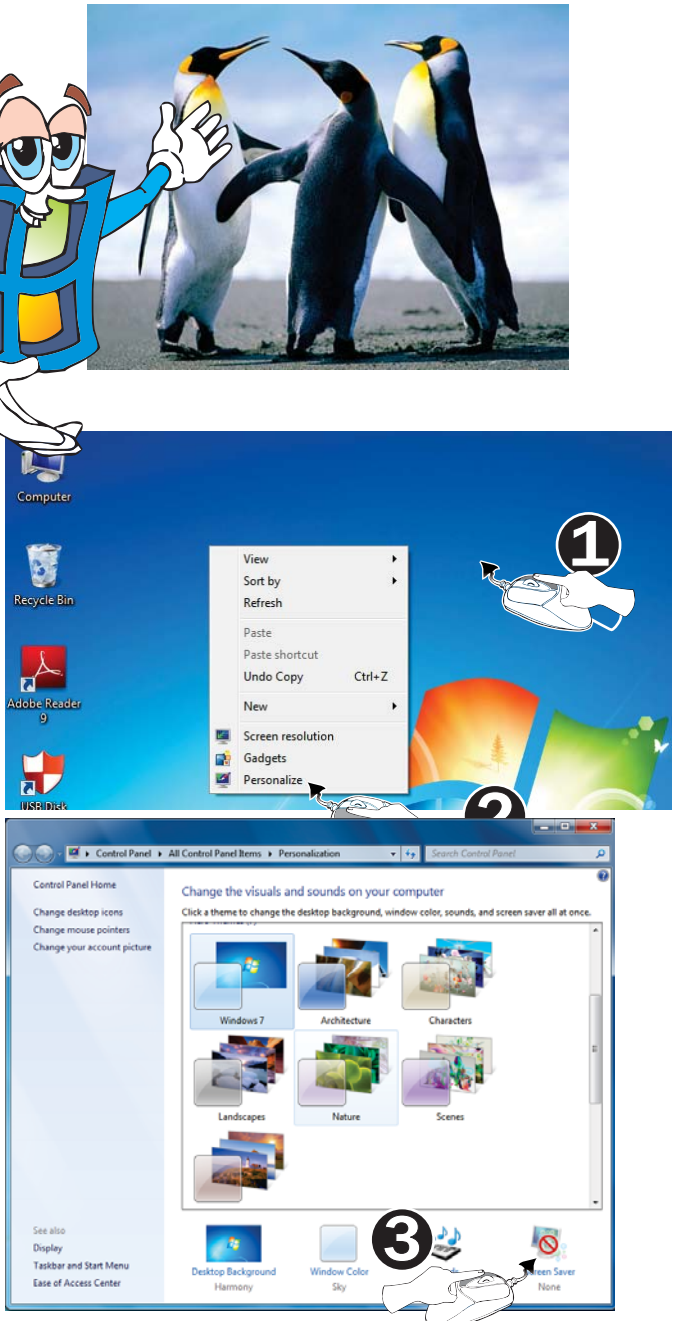

Screen Saver is a moving picture or pattern that appears on the screen when you do not use your computer for a period of time. You can

FOR WINDOWS 7 USERS:

Setting Up A Screen Saver

1. Move the mouse pointer(↔) over the blank area of your screen and then press the **right** button. A pop up menu will appear.
2. Move the mouse pointer(↔) over **Personalize** and then press the left button.
2. Move the mouse pointer(↔) over **Screen Saver** and

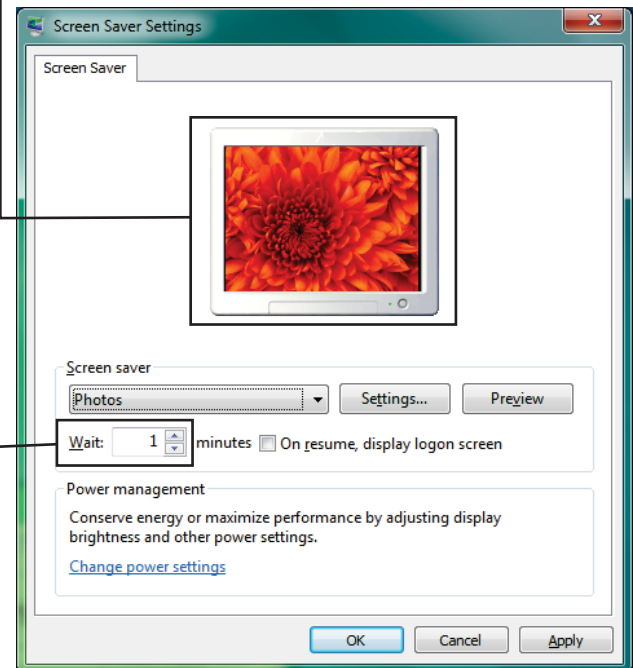

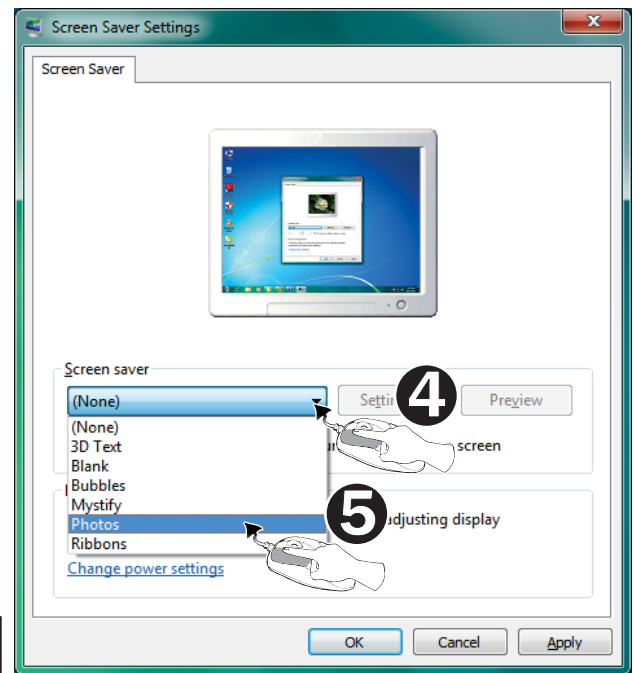

The **Screen Saver Settings** dialog box appears.

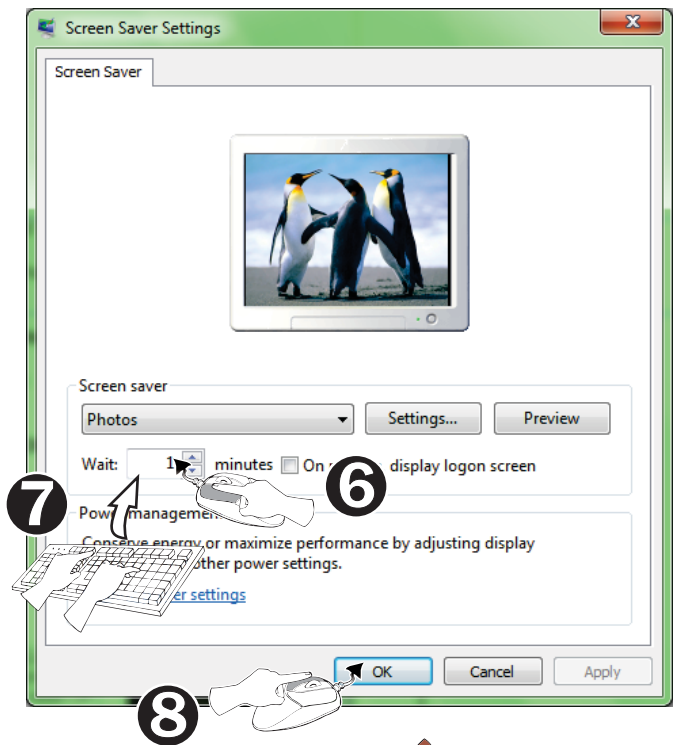

4. Move the mouse pointer(↔) over the Screen saver area and then press the left button.
5. Move the mouse pointer(↔) over **Photos** and then press the left button.

This area displays how the screen saver will look like on your screen.

The screen saver will appear when you do not use your computer for the amount of time displayed in

6. To change the amount of time, move the mouse over the Wait area and then press the left button.
7. Press **Backspace** or **Delete** to remove the existing number and then type a new number.
8. Move the mouse  over **OK** and then press the left

Screen savers were originally designed to prevent screen burn, which occurs when an image appears in a fixed position for a period of time.

Today's monitors are better designed to prevent screen burn. But other people still use
