

WHAT INTERNET OFFERS

Lesson 3

The Internet has made the world a global village. With just a click, everything is laid before you.

Electronic Mail

Exchanging electronic mail (e-mail) is the most popular feature on the Internet. You can exchange electronic mail with the people around the world, including friends, colleagues, family members, customers and even people you meet on the Internet. Electronic mail is fast, easy, inexpensive and saves paper.

Information

The Internet gives you access to information on any subject imaginable. You can review newspapers, magazines, academic papers, government documents, television show, famous speeches, receipts, job listings, works by Shakespeare, airline schedules and reservations and much more.

Entertainment

Hundreds of games are available on the Internet, including educational and strategic realistic games.

The Internet lets you review current movies, listen to top 10 songs hit list and even with the people around the world.

Online Shopping

In the Internet, one can order goods and services without ever leaving the desk. You can buy items such as books, flowers, software, pizza, used cars and much more.

Softwares

Thousands of programs are available on the Internet. These programs include word processors, electronic spreadsheets, games, anti-virus and utilities to improve the performance of your computer.

Forums or Group Discussion

Forums on the different subject matter are available in the Internet. You can join group discussions to meet people around the world with the same interest, and you can even ask questions.

Topics of discussions include music, environment, music, photography, religion, sports, politics and almost everything you can think of can be found on the net.

Blogging

Blogging is the most-used term in group discussion. Everyone can share his or her thoughts, insights, opinions and expertise through blog or blogpost.

One of the top ten most visited blog post is the Huffington Post nearly 100,000,000 visitors a month and TechCrunch - 98,000,000 visits per month. Anyone can have a space on the internet for blogging. Many web sites offer free space on the internet like Blogspot.com, where you can upload, update your blog web site.

Some have forums on the same interest and follow by tweeting using the social media Twitter. Now, Facebook enables group's discussions by creating a group where friends can hang up and talk of common interest.

LABORATORY MANUAL

Lesson 3 What Internet Offers

Part 1 Chapter 1

Lab. 3.1 Fix Me!

Estimated Completion time: 15 - 20 Minutes

Directions:

1. Launch **Inspiration**.
2. Open and answer **Fix Me**
3. Click the title symbol in the center of the swirl picture to show the blue drop-down arrow. Then click the arrow. If a Symbol Overlap dialog box appears, choose the Let Overlap button. Six (6) decision blocks will appear. Each decision block symbol has a note. To show the note, just click the symbol. The note is found in the upper right corner, above the drop-down arrow.
4. Click the note to see the meaning of the scrambled letter inside the decision block symbol.
5. Click and drag the scroll bar to read the whole text. To answer, just click the blue drop-down arrow. Click further on Let Overlap and the answer symbol will appear.
6. Double-click the symbol to type your answer. Click and drag the anchor point found in the corners of each symbol to fit the text.

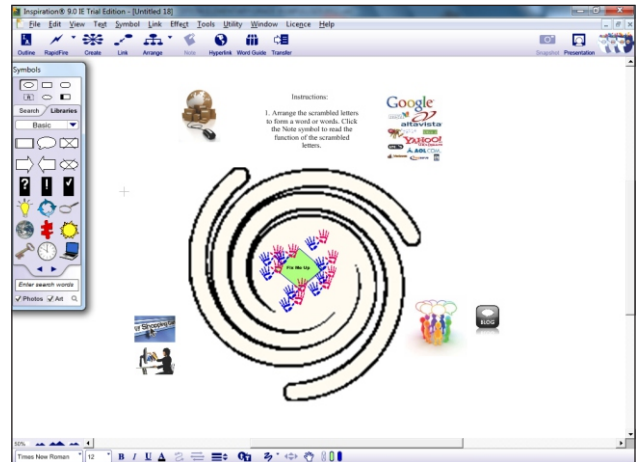

Note: Always choose the Let Overlap button in the Symbol Overlap dialog box.

7. Save the activity as **FixMe!**
