

LESSON 4

THE MOUSE AND ITS PARTS

The mouse is an input device that helps the keyboard give instructions to the computer.

Below are the parts of a typical trackball mouse,

There are three types of mouse which are commonly used today. These are the trackball, optical, and wireless mouse.

Trackball Mouse

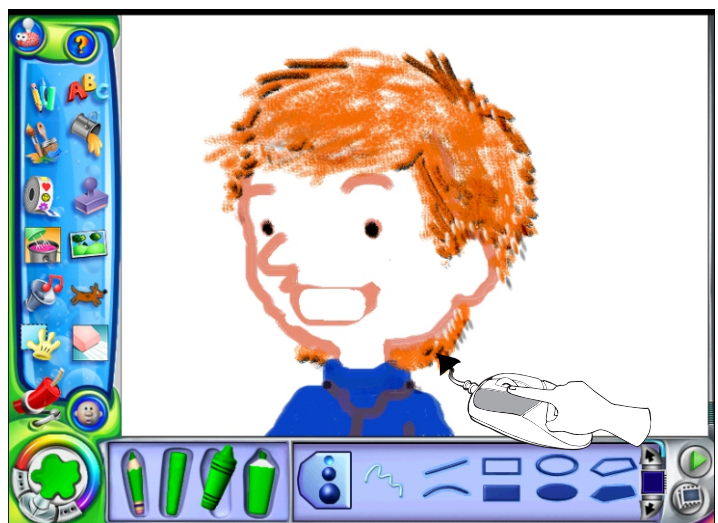

Optical Mouse

Wireless Mouse

Most schools are using the optical mouse. This type of mouse is better than the trackball mouse since it fast and accurate in movement.

You can use the mouse to choose commands from menus and draw pictures on-screen.

Comprehension : Mouse

Activity 19

Read about mouse. Then write your answers.

Mouse

The  is an input device that helps the  give instructions to the .

You can use the  to choose commands from menus and draw pictures on-screen.

The three types of  are the trackball, optical and wireless .

Most  are using the optical . This type of  is better than the trackball  since it fast and accurate in its movement.
