

# Lesson 9

## INFO'S PASSAGE

### Input/Output Devices

### INPUT / OUTPUT DEVICES

The input/output devices are peripheral devices that perform dual functions as input and output device.

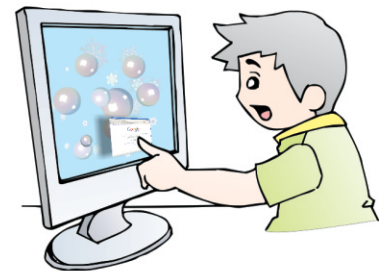

#### Headset

It has a microphone as input device to communicate or record your voice. At the same time, it has a headphone as output device for you to hear the sound.

#### Touch Screen

It uses the screen as input device to enter the information. At the same time, it is used as an output device to show the result of what you have entered.

#### Digital Camera

It is used as input device to take pictures or moving graphics. In the same manner, it becomes an output device from which you can see the results of the pictures and graphics you have taken.
