

# MULTIMEDIA ON THE WEB

## Lesson 6

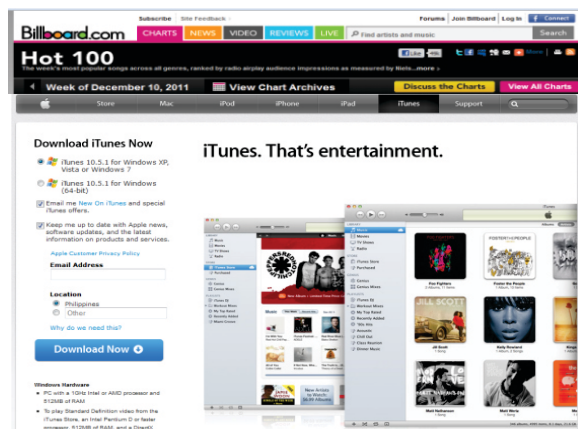

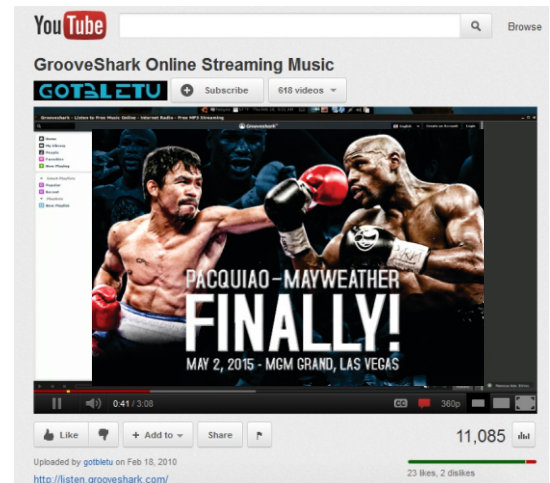

Most of the Web pages in the Internet nowadays contain audio, video and animation or what we called multimedia. Multimedia enabled Web pages commonly found in many advertising Web sites to attract potential buyers online.

Having all of these types of information may require a good computer specification to make them worked well in your screen.

### Streaming and Animation

You can watch sneak preview of your most wanted coming soon videos over the Internet. Also, your favorite anime cartoon movies are available for download and online streaming.

Most of the social media like YouTube and Facebook offers this features wherein you can upload, download or stream videos from the internet.

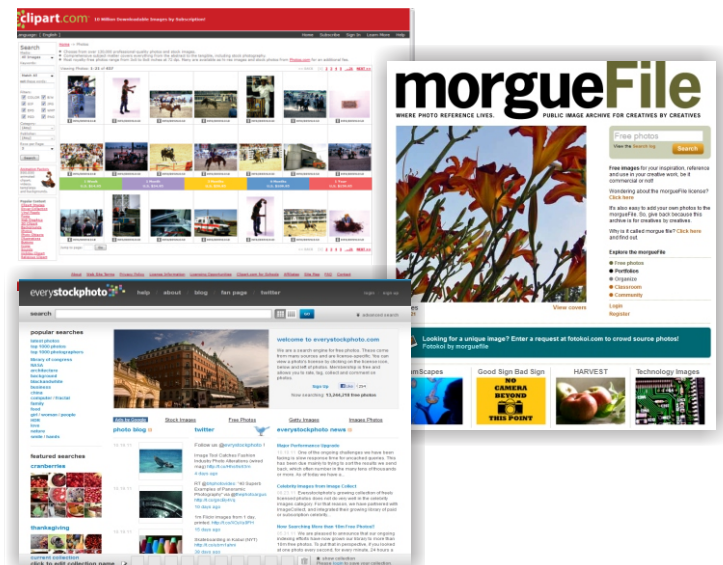

### Music

Old time and the latest music with music videos are found on the Internet. You can hear them while downloading. Some Web sites offer free of charge for some mp3s download. Try to google iTunes and Billboard and you can find music of your choice.

### Pictures and Images

The Internet is the best resource when it comes to pictures and images; they are available to be copied for free but some may require a small amount of charge. From 2D to 3D images, name them and you can get them. The most visited web sites when it comes to pictures is the ClipArt.com, Everystockphoto.com, and MorgueFile.com.
