

Lesson 6

God Made Man; You Made Me

Computer Versus Man

When did man ever beat machines? Probably never or maybe he beats them all the time. How about when you are a chess master? Will you beat the computer? Definitely, yes. After all, it is man who programs the computer.

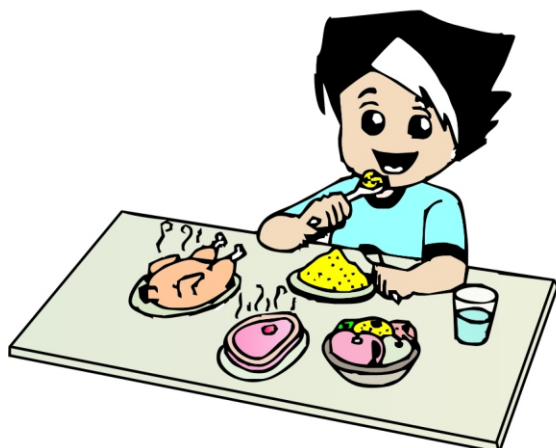

Even the renowned man vs. machine programmed computer chess game which is tough to beat had not maintained its record after the world's No. 1 chess master Garry Kasparov defeated it. Kasparov proved to everyone that man wins over a computer.

Below are the comparison between **computer** and **man**.

1. Computer works faster than man.

2. Computer needs electricity to work while man needs food to work effectively.

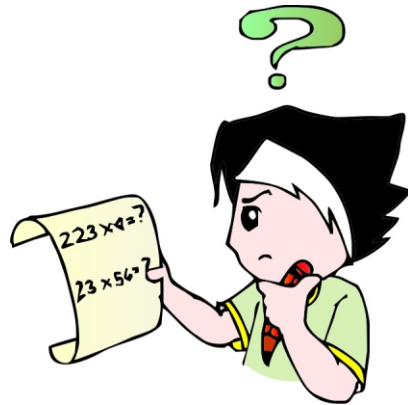

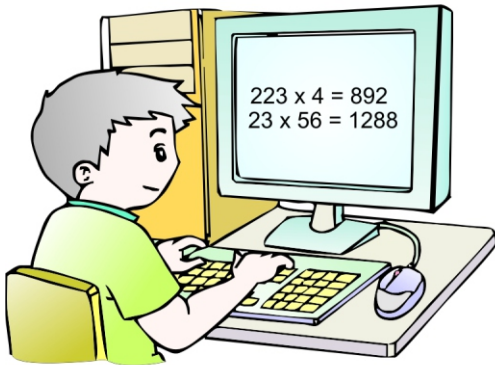

Lesson 6

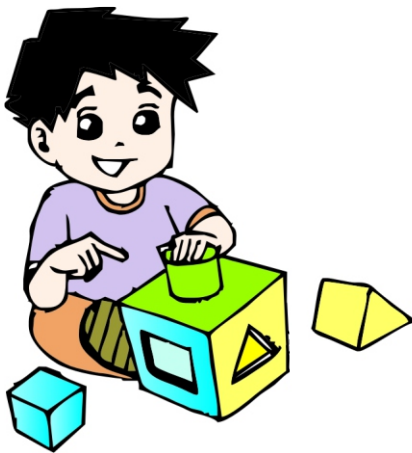

God Made Man; You Made Me

Computer VS Man

3. Computer computes mathematical problems faster than man.

4. Computer can do only what man wants it to do while man uses his common sense to think what he is supposed to do.

5. Computer increases memory by adding memory chips while man increases memory and knowledge by studying and researching.
