

LESSON 13

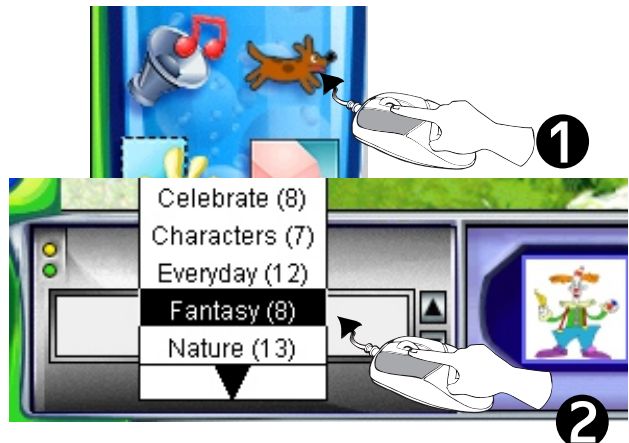

Animations

Animations are stickers that move like cartoons when you play them.

To add an animation:

Step 1. Click the Animations button to open the Animations library.

Step 2. Choose a folder. Click the folder name to see a pop-up list of folders, or use the scrolling arrows to see more choices.

Step 3. Scroll through the animations. Use the up and down arrows to see more choices.

Step 4. Drag an animation onto your picture.

To move, change, or delete an animation:

Step 1. Click an animation in your picture to see its frame.

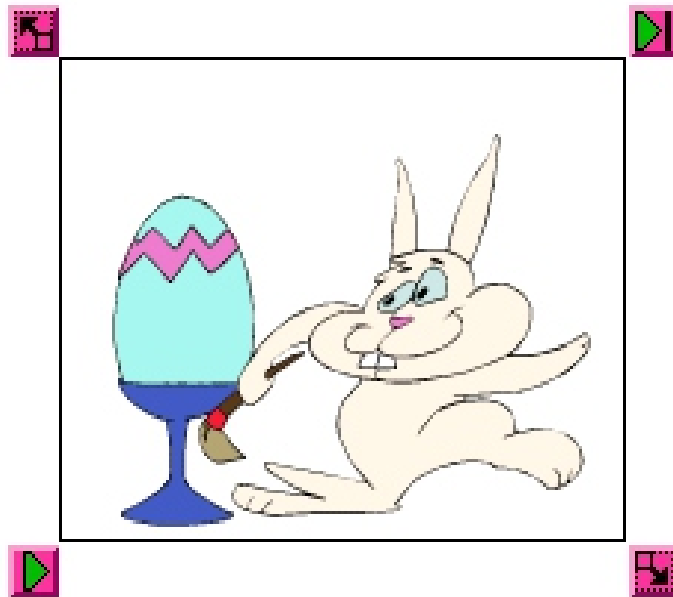

Step 2. Do any of these things:

- To move an animation, click inside its frame and drag. Click to release it.
- To resize an animation, drag a Scale handle on its frame.
- To make an animation part of the background, click it, click the Toolbox menu and choose Flatten Stickers and Animations. Specify the selected animation or all animations. After an animation has been flattened, it cannot be moved or changed anymore.
- To delete an animation before it is flattened, click it and press the Delete key on your keyboard. If it has already been flattened, use the cutting tool and refill the background.

Playing Animations

You can play animations in a loop or frame-by-frame.

To play an animation in a loop:

1. Click the animation.
2. Click the Play in a Loop handle.
3. To stop playing the animation, click Play in a Loop again.

To play an animation frame-by-frame:

1. Click the animation.
2. Click the Frame-by-Frame handle. Each click advances the animation one frame.

Animation Tips

- When you print your picture, the animation frame you see is the one that prints. You can play the animation step-by-step and stop at the frame you want to see printed.

Animated Adjectives

Activity 28

Hands-on Activity

Look at each group of animated pictures. Complete each line to show comparative adjectives by copying and resizing the given animated pictures. Click the Play button to show all animations.
