

Lesson 13

My Keeper Storage Media

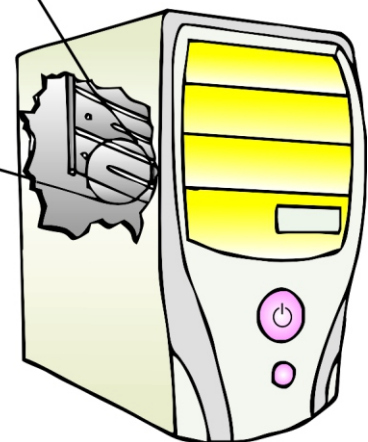

Disks are storage devices. You can save your files in a disk. The pictures you see below are the devices you can use to save your files for future use and reference .

A. Portable Hard Drive

Portable hard drive is inserted into the USB port, located usually at the back of the system unit. You will be able to save information in the form of files like pictures, music and videos.

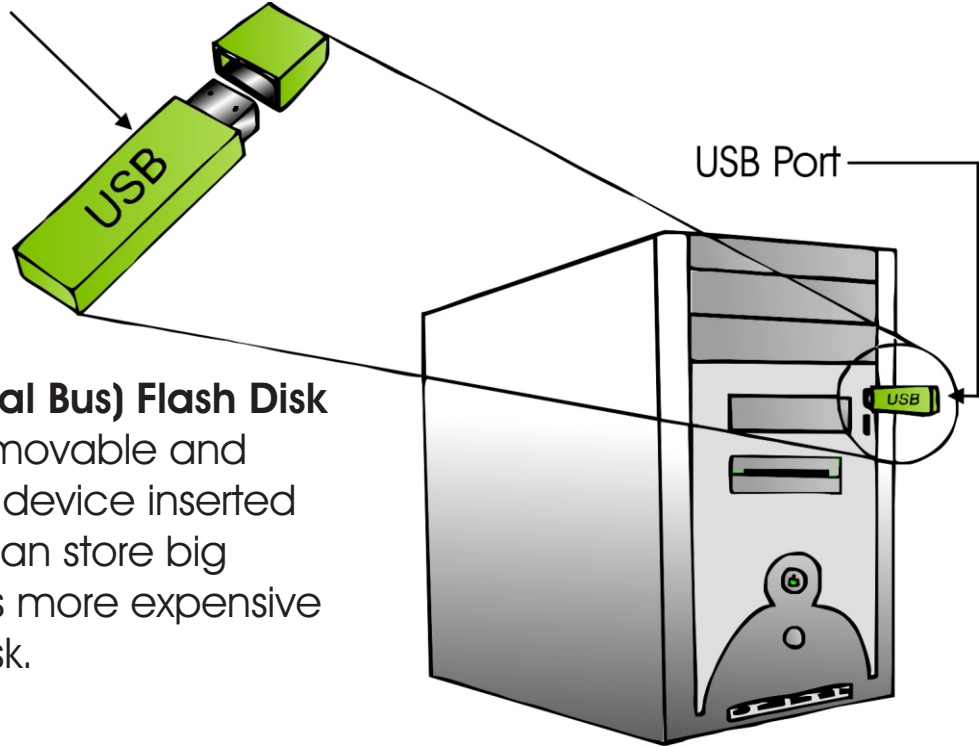

B. Internal Hard Drive or Fixed Disk

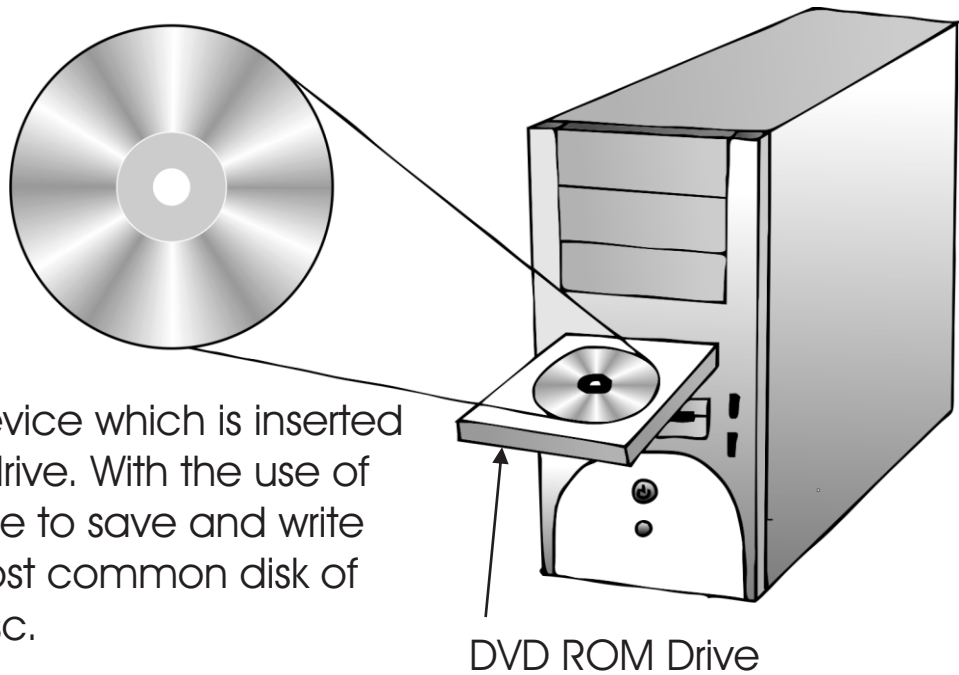

Hard Drive or **Fixed Disk** is a storage device that is placed permanently inside the system unit.

C. USB Flash Disk

USB (Universal Serial Bus) Flash Disk is a small, light, removable and rewritable storage device inserted in the USB port. It can store big volume of files. It is more expensive than the floppy disk.

D. DVD (Digital Versatile Disc)

DVD is a storage device which is inserted into the DVD ROM drive. With the use of DVD, you will be able to save and write information. The most common disk of today is the DVD disc.
