Why Do Babies Cry So Much?

Babies cannot talk and ask for what they want. So, they cry to let their parents know they need something.

When newborn babies cry, no tears flow from their eyes. It takes a few weeks before the parts of their eyes that make tears begin to work properly.

3. Save the activity as **Babies Cry So Much**.
4. Add the following paragraphs between the first and the second paragraphs.

Sometimes, it may be because the baby is hungry or needs a nappy change.

Sometimes, the baby may be tired or unwell. Other times, the baby may simply need some love.

If the first few weeks after they are born, babies can make a lot of noise when they cry.

However, it takes them a few weeks old before their eyes develop the ability to tear.

4. Save the activity as **Babies Facts**.
5. Move the second paragraph after the fourth paragraph by highlighting the whole paragraph and drag it to the desired location.
6. Format the paragraphs by applying font styles, adjusting the font size and color. Be sure to save the document before you exit.
