

# Color Effects

## Lesson 19

The common scene that we see is a text in the black shade printed on a white paper. Today, the same thing holds true. However, with the innovations constantly pouring, even text requires to be updated to colorful. Colors without doubt give life to the boring impression of text.

### Color Effects Toolbar

The **Color Effects Toolbar** feature allows you to change the color of text and add text effects.

### To display the Colors Effects Toolbar

Click on the  **Colors Effects** Toolbar button. The toolbar at right will be displayed.

### How to change the font color

The **Font Color** feature allows you to choose a font color.

1. Select text within your workbook.
2. Click the **Font Color** button.

The Font Color dialog box will be displayed.

3. Select a color from the **Color Palette**.

When you have selected a color, the color is displayed in the  color circle.

4. Click the **OK** button to accept the color.

The **Random Color Letter** feature randomly changes the color of each letter in the selected text. Select the text and click the Random Color Letter button to apply this effect.

The **Random Color Words** feature randomly changes the color of each word in the selected text. Select the text and click the Random Color Words button to apply this effect.

**Fill Color Button** feature fill a certain shape with colors. Click on the Fill Color button, select a color from the color palette and click the OK button to accept the color.

## Choose Color Effects

Color can be added to text, shape lines, cells and fill shapes.

When clicking the **Fill Color**  button, **Cell Fill Color**  button, **Line Color**  button or **Font Color**  button, a dialog box will be displayed.

Select a Color from the Color palette.

The selected Color is indicated in the Color  circle.

Click the OK button to apply the Color or the cancel button to quit.

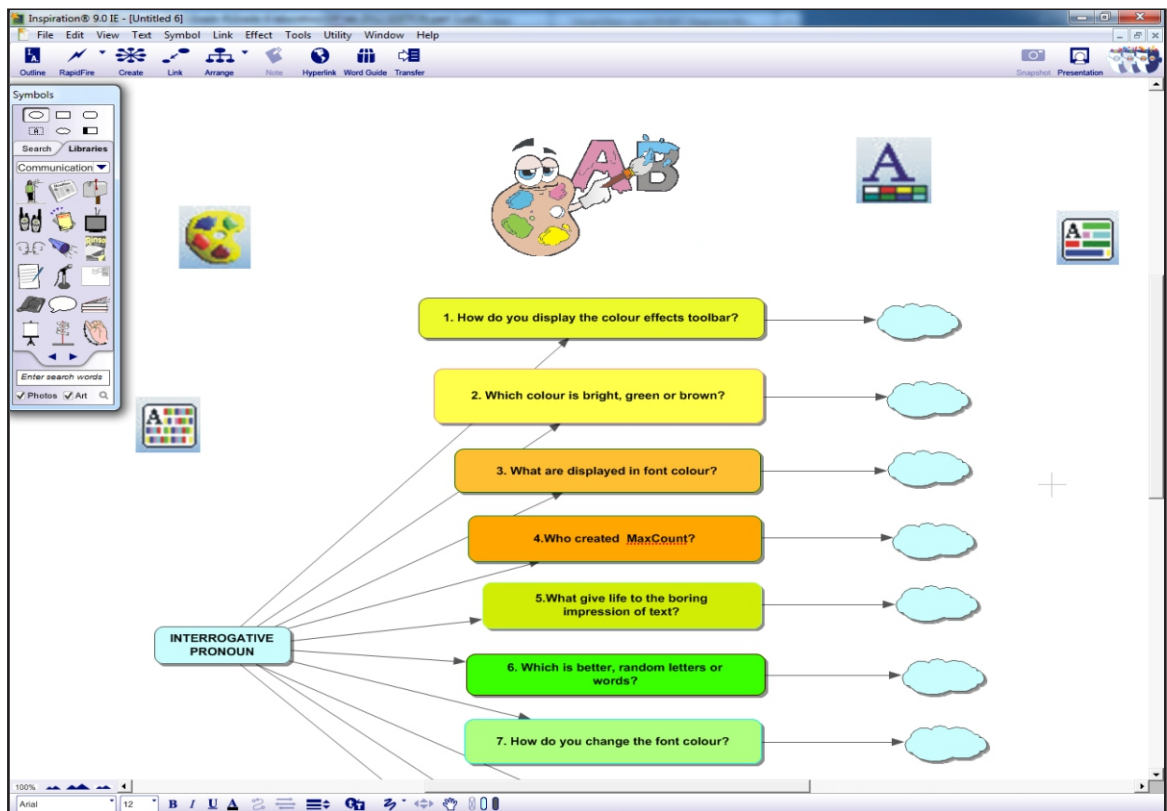

Directions:
