c. Second paragraph	----> Font: Tahoma	Size: 22
c. Third paragraph	----> Font: Tahoma	Size: 22
4. Save the activity as **Dog's Tail Modified.**

## Lesson 35-37

What's my score?

**SCORE**

## Activity 3

Directions:

1. Start WordPad.
2. Type the text below about parrots. Change the font style, size and color as well as all the text in the paragraph with your own format. Make your paragraphs as colorful as the parrot and artistic too.
3. Save the activity as **Parrots Able to Talk.**

## Lesson 35-37

What's my score?

SCORE

## Why Are Parrots Able to Talk?

A parrot has a large, thick tongue. It is not quite like human's but it does help the bird to copy sounds that it hears often.

Although it can be trained to repeat words, a parrot does not understand what it is saying.

## Activity 4

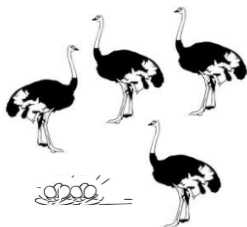

Directions:

1. Start WordPad.
2. Open the document **Hens and Their Eggs.**
3. Add the following text below the last paragraph. Apply your own font style, size and color.

## Lesson 35-37

What's my score?

SCORE

All birds keep their eggs warm to make them hatch too. After laying their eggs, birds keep them warm until they are hatched. The mother may do this all by herself; the father bird may do it or sometimes the two take turns.

Many mother ostriches lay their eggs in one nest. Then the father ostrich keeps them warm.

Penguins usually lay only one egg. Using their feet, they hold it up against their stomach feathers to keep it warm.

4. Save the activity as **Laying Eggs.**
