

LESSON 4

Using Fill Bucket

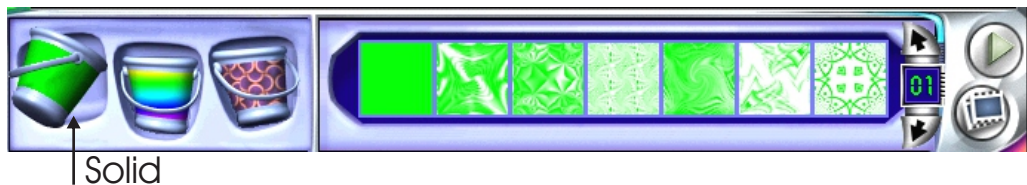

LEARN

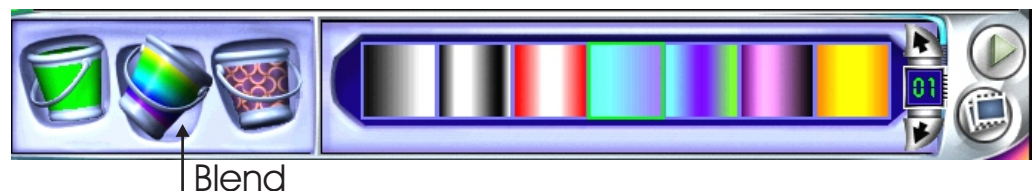

Fill bucket lets you fill up an area of your picture. There are three Fill Buckets. Solid fills an area with one solid color or a single-color pattern. Blend fills an area with a blend of colors. Pattern fills an area with a multi-color pattern.

To fill an area:

Step 1. Click the Fill Bucket button to see the Fill Buckets tray. Then, select Solid, Blend, or Pattern fills from the tool choices. Click on the library choice to see the varied color effects you can use.

The **Solid Fill** Bucket uses the current color in the Color Picker. Choose solid or a single-color pattern.

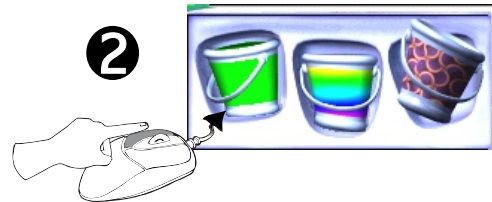

The **Blend Fill** Bucket doesn't use the current color in the Color Picker.

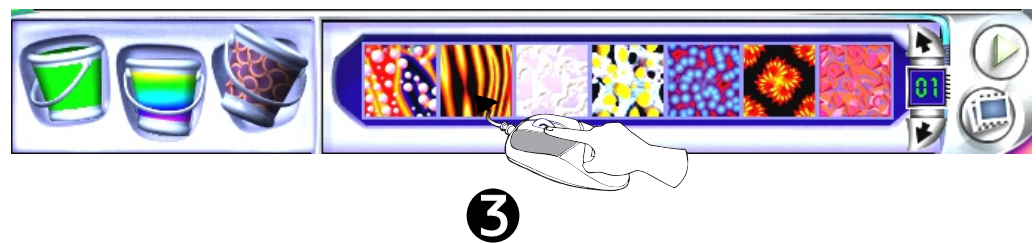

The **Pattern Fill** Bucket doesn't use the current color in the Color Picker. You can pick a multi-colored pattern.

Step 2. Pick a bucket from the left side of the tray.

Step 3. Choose a fill from the right side of the tray.

Step 4. Click inside the area on your KidPix page to fill.

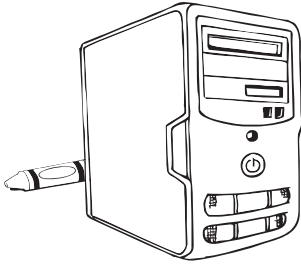

Positions

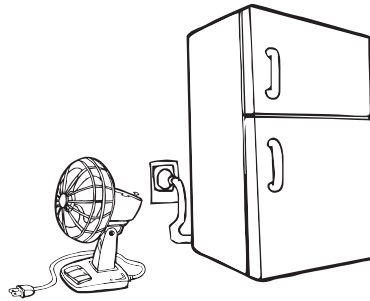

Activity 12

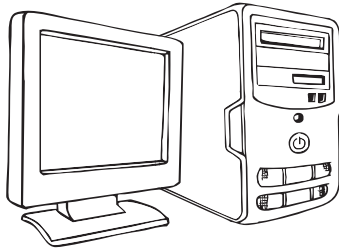

Use your crayons as your Fill Bucket tool to color the objects being described.

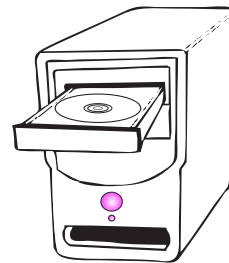

It is behind the system unit.

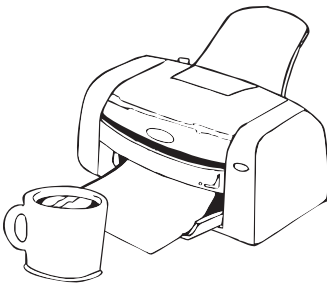

It is on the left of the refrigerator.

It is beside the monitor.
