Paint Shapes

You can paint shapes using the Shapes tool.

A. Click the Paint button on the toolbar.

B. Click the Shapes tool on the Paint panel.

> You will see the shape options in the Options panel.

C. Select and click a shape.

D. Use the Width slider to change the width of the line for the shape.

E. Select and click a color on the color palette.

F. Click and drag on to the canvas. The shape will be painted on the canvas.

To constrain the shape, press and hold down the Shift key on the keyboard while you click and drag. Use this option if you are drawing squares, circles, and other shapes when you want the height to match the width.

To draw a solid (filled) shape, click the Fill button box on the options panel.
